NEXT-LEVEL PERFORMANCE:  
PERFECT SYMBIOSIS OF DYNAMICS AND PRECISION.

# CORiTEC® 350i X PRO series

## PERFECT SYMBIOSIS OF DYNAMICS, STABILITY AND PRECISION

The combination of new, perfectly tuned control and drive components ensures the highest performance in this machine segment. Processing times reduced by up to 50% combined with excellent surface quality allow significant increases in workload and optimize the price-performance ratio.

The new zero point clamping system **powerCLAMP** generates 4 times **XtraPower** clamping force. The resulting stiffness and further reduced vibration characteristics allow a quantum leap in performance. In combination with the extremely powerful 3 kW milling spindle, the highest demands on surface quality are achieved and new standards are set in this machine segment.

Modern and fresh design paired with optimized and smart handling completes the overall concept.
