IMPLA 3D Navigation

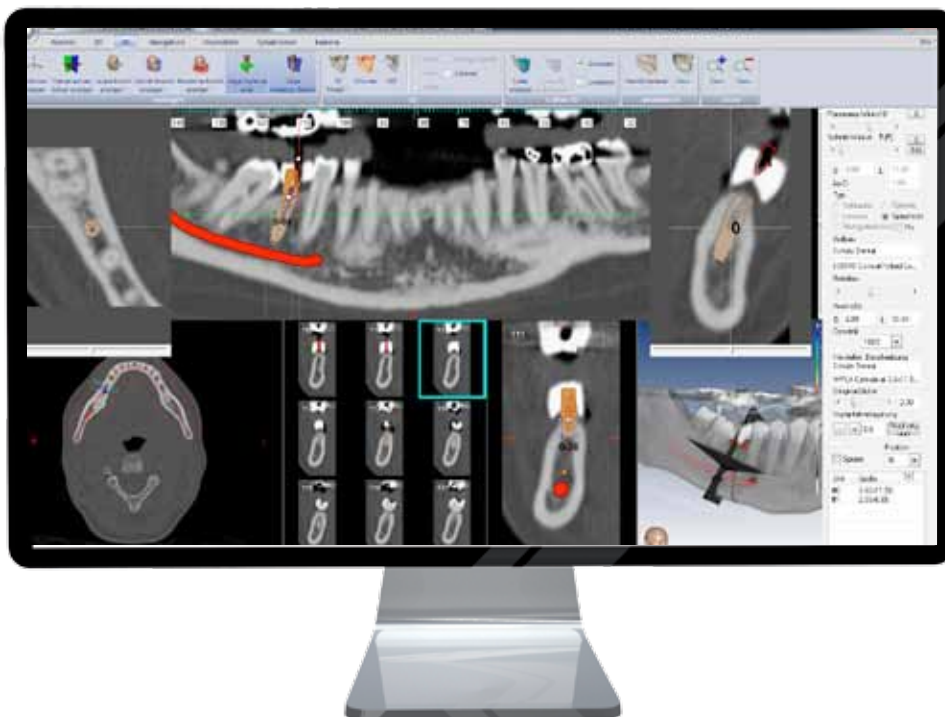

IMPLA 3D Navigation Planning & Diagnostics

There are countless reasons why so many specialists would recommend using a 3D implant planning system: Your patients can be reassured that they are being treated with the highest level of safety. And should you feel it necessary, you can easily document the treatment.

Your patients will soon be put at ease as they realize that they are in the safest of hands with you. By simply showing the images on the screen, you will find the treatment extraordinarily easy to explain. It couldn't be easier for the patients to feel safe and to understand the clear advantages of such a treatment.

By pre-planning the procedures virtually, you and your team will be relieved of most of the stress that comes associated with the surgery. You will find that you can predict the results and that they become technically more refined. What's more, IMPLA 3D is part of Schütz Dental's „Complete Digital Workflow“.

IMPLA 3D Navigation Theta-Axis Table

The Theta-Axis Table gives your lab the chance to convert the data programmed by your IMPLA 3D software into drill templates. This offers your dentists real added value, which will make you stand out from the competition.

Through the inspection record of the IMPLA 3D software, the angulation and depth of the drill sleeves are controlled after being positioned by the Axis Table.

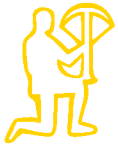

IMPLA THETA-Axis Table

IMPLA 3D Lab Set

	Description	art. no.
	universal dispenser	220900
	sleeve holder	638202
	carrier sleeves for drill template	638203
	IMPLA Position Key IPK	638200
	IMPLA Position Key IPK long	638345
	drill 5.35 mm for IMPLA 3D THETA	638428
	drill 4.25 mm for IMPLA 3D THETA	638427
	drill 3.35 mm for IMPLA 3D THETA	638426
	drill 2.0 mm for IMPLA 3D THETA	638425
	acrylic pins 2.5 mm 40 pc.	638343
	IMPLA 3D drill guide sleeve 2.5 mm x 9.5 mm	638324
	IMPLA 3D drill guide sleeve 2.5 mm x 11.5 mm	638300
	IMPLA 3D drill guide sleeve 2.5 mm x 13.0 mm	638301
	IMPLA 3D drill guide sleeve 2.5 mm x 14.5 mm	638302
	3D prosthetics box	635587
	electronic caliper, in hundredth	638212

The illustrations may vary from the actual tools in appearance and proportion - depending on the size of each tool.
