Features

Auto calibration

Large number of holder systems

WHETHER WET OR DRY MACHINING, BLOCK OR BLANK FORM, THE CORITEC 150i SERIES **IMPRESSES IN ALL AREAS.**

Each restoration is fabricated with optimum precision and, at the same time, the flexibility opens up an almost free choice of materials and indications. Milling and grinding of zirconium, plastics and metal** is possible, as is the machining of CAD/CAM blocks and Pre-milled abutments. The CORITEC 150i offers an unrivalled variety of applications in a very small space.

UNLIMITED FLEXIBILITY IN MILLING AND GRINDING - THAT'S THE PROMISE OF THE CORITEC 150i SERIES

Thanks to a machining angle of up to 360°/130° (A-axis/B-axis), the system is able to effortlessly master even the most demanding tasks. The 10 tool places additionally increase the flexibility of the new COR TEC 150i series.

Features

MORE PERFORMANCE, MAXIMUM FLEXIBILITY AND EXTENDED APPLICATION POSSIBILITIES WITH MINIMAL SPACE REQUIREMENTS

An exceptional ratio of power, speed and precision - this is what the powerful high-frequency spindle with 750 W and 100.000 rpm offers. Thanks to the quick-clamping system, the various holder systems can be changed quickly and easily - while maintaining the same precision. Time-consuming calibrations are therefore unnecessary.

A VARIETY OF HOLDING SYSTEMS **OFFERS MAXIMUM** FLEXIBILITY FOR MAXIMUM CHALLENGES

Also new is the support of the half-open blank holder, the so-called "C-Clamp". Thanks to its open shape, it allows even the most difficult indications to be produced.

CORITEC 150i PRO

THE FLEXIBLE MILLING SYSTEM IN CONFINED SPACES

The extremely stable design of the mono-block cast body enables precise machining with round blanks and block forms. The machine's small dimensions and 5-axis simultaneous technology offers a unique ratio of machine size and functionality. Convince yourself of the performance of the CORITEC 150i for your laboratory!

Available in two versions:

CORITEC **150**i

CORITEC 150i dry

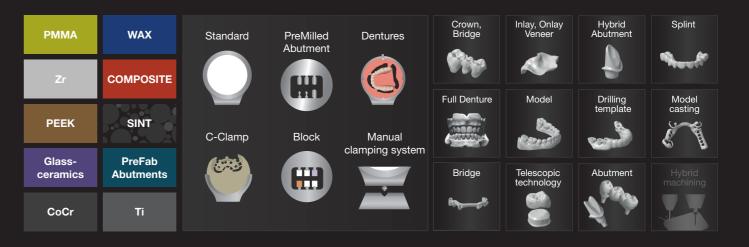

CORITEC 150i PRO

HIGHLIGHTS

- Novel, closed mono-block cast body for highest stability and precision
- No external PC required
- Half-open blank holder "C-Clamp" (optional)
- Ionizer inclusive
- High precision due to integrated temperature compensation
- Wet and dry machining possible
- Minimum external compressed air, only 3 bar required
- Short amortization period
- Minimal footprint
- Auto calibration
- Automated cleaning function
- Metal processing*
- Turn-milling-grinding-processing possible

*Limited metal processing (blank) in preparation

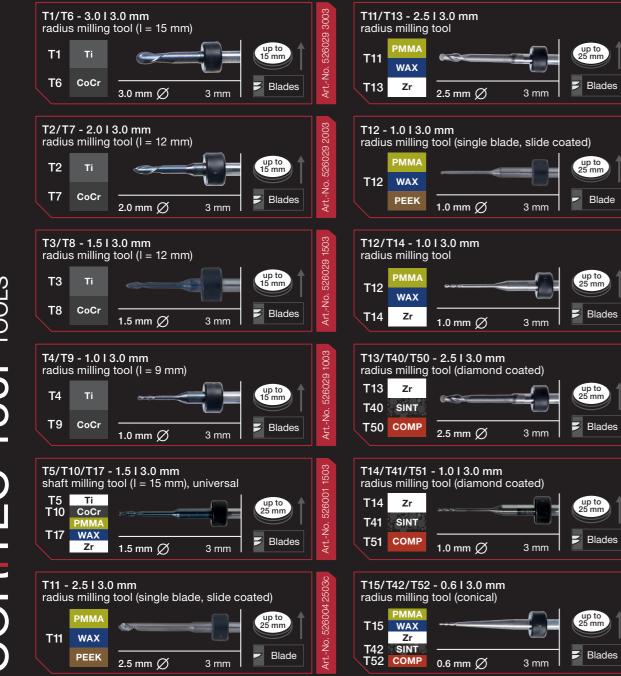

EASY CLEANING fully coated enclosed wet cell

POWERFUL PERFORMANCE high end spindle for milling and grinding work up to 100.000 rpm

CORITEC Materials

CORITEC ZR (ZIRCONIUM DIOXIDE)

Covers all indications for dental restorations of up to 16 units. Ideally suited for monolithic restorations.

- Highly translucent zirconium dioxide for natural esthetics
- Increased strength compared to lithium dioxide

CORITEC ZR (ZIRCONIUM DIOXIDE)

- Single crowns
- Single cap
- Bridges up to 16 units, full bridges, and PFM technology

CoCr Disc (non-precious alloy)

CoCr Mo Disc (non-precious alloy)

Good mechanical properties

- Good milling properties
- Corrosion resistant

Ti Disc (Grad 2, Grad 4, Grad 5)

JUVORA PEEK (POLYETHERETHERKETONE)

- Clamp-retained constructions
- Juvora PEEK in its basic colour (brown-beige)
- Highest biological compatibility

CORITEC WAX DISC (WAX, GRAY)

CORITEC Wax Disc is not suitable for intraoral application. After milling, the material can be used as lost wax. Moulds can be used in casting technology. It can be milled easily and combusted residue-free.

CORITEC PMMA (POLYMETHYL METHACRYLATE)

• Bite guards, therapeutic splints, drilling templates, bite regulators

PMMA Splint Disc

CORITEC MODEL DISC IVORY

- Blank for the production of dental models
- Low-cost material
- Also suitable for test purposes or for milling calibration bodies

- Very good mechanical properties
- Aesthetic shade effect due to high translucency
- Good milling behaviour

COR TEC SmartControl[™]

SMART CONTROL OF MACHINE SOFTWARE

SmartControl[™] one touch ahead!

The newly developed control software "SmartControl[™]" provides absolutely intuitive operation of our milling machines. From selecting the job to milling or querying the machine status; the self-explanatory and optimized handling makes it possible to start operating the machine in the shortest possible time. Starting a milling process requires only two clicks - benefit from the smart time savings for your workflow!

FEATURES

- Modern touch control design
- Easiest operation through intuitive graphical user interfac
- High end performance for imes-icore[®] machines
- Remote monitoring
- Job management with 3D preview
- Multi-language support*

Optimized for touchscreen operation

Scanner compatible with exocad

CORITEC i3Dscan color

- The object to be scanned is automatically guided into the measuring field
- Modern touch control design
- The 180-degree opening offers a large working area

CORITEC i3Dscan color HR

- Enormously high scanning efficiency and precision (4 µm)
- Color texture scan
- Blue-Light LED & high resolution camera (2.8 MP)
- All modules included in the scope of delivery

CAM software

CORITEC iCAM V5 smart

- All strategies optimized for 5-axis simultaneous machining
- Automatic exchange of implant connections (ReFit option)
- No annual license fees
- Fully automatic and easy operation with "Wizard Workflow"

CORITEC ICAMHD

- hyperDENT based CAM software
- Flexible payment model (purchase or subscription model)
- Three months free use with CORITEC 150i machine purchase

Full integrated workflow

OPEN TO ALL COMMON SCANNERS

Applications & holders

HALF-OPEN BLANK HOLDER (C-CLAMP)

- Enables 5-axis machining up to 90 degrees axis adjustment
- Extension of the technical possibilities of your milling machine

UNIVERSAL HOLDER FOR TURN-MILL-GRINDING PROCESSING

- High precision
- Improved surface quality
- Tool-saving machining

PREFABRICATED ABUTMENTS

- Short production times
- Production of abutments in very simple processes
- High accuracy of fit due to prefabricated implant interface

DESS

Abutmentholder

THERAPEUTIC SPLINTS

- Bite splints, bleaching splints
- Snoring splints, aligners
- Simple and high-guality implementation in CAD/CAM processes

GRINDING OF CAD/CAM BLOCKS

- New 6-fold adapter enables effective production
- Wxchangeable strips for different adapter systems
- Crowns, onlays, inlays, veneers, bridge frameworks, etc.

MILLING OF MODEL CASTS

- Production in combustible materials (PEEK)
- Allergy-free and lightweight model casting when using PEEK
- Cost-efficient

(Medentika)

MED-Preform[®] Abutment (medentis)

Sintering furnaces

iSINT eco

The iSINT eco stands for economy and offers high-quality technology, matching accessories for high standards at a fair price. Compact and with a small footprint, the iSINT eco sintering oven still has sufficient capacity for a sintering bowl Ø100 mm for approx. 25 units. The door stop can be mounted at the right or left side.

iSINT PRO

A larger sintering capacity of up to 80 single crowns is offered by the new iSINT With a heating system of four high-quality molybdenum disilicide (MoSi2) heating elements, you can choose between conventional long-term sintering or SPEED sintering at a rate of up to 90 °C/min/210.20 °F/min. The iSINT F is operated with a simple and convenient program control. The programs are indicated on a 4-line LCD display. A timer function for overnight sintering or the use of pre-drying programs for shaded zirconium restorations offer further options. In addition, three service programs are available for easy maintenance of the sinter furnace.

| | iSINT eco | iSINT PRO |
|-----------------------------|-----------------------|---------------------------|
| Number of heating elements | 4 | 4 |
| Display | 7-Segment | 4-line LCD |
| Number of program memories | 9 | 30 |
| Combustion chamber capacity | 1 x 100 | 2 x 120 |
| Max. heating rate | 30 °C/min / 86 °F/min | 99 °C/min / 210.20 °F/min |
| Power in W | 1300 | 3200 |

Suction system

iVAC silent & iVAC silent PRO

The system is equipped with a teflon filter catridge, automatic filter cleaning and a dust drawer. With the suction power of 160m³/h the iVAC silent is perfectly suited for your CORITEC 150i and is even stowable in the optional machine table.

| | iVAC silent | iVA |

Sales and support partner worldwide

Represented for you in over 100 countries.

imes-icore[®] GmbH has been a leading manufacturer and technology partner since 2003 in the field of dental CAD/CAM systems and solutions.

With its unique range of dental milling and grinding systems, imes-icore[®] offers a perfect selection for all individual requirements of dental laboratories, milling centres and dental practices of all sizes.

Our "Open-System" product philosophy makes it possible to easily integrate our milling machines into your existing workflow and to integrate them with your open scanners and your CAD/CAM software. We are open for your material selection. Dealer for the Netherlands:
